Profile

I design and build web applications, CRM integrations and product features that use AI models. I have spent more than 18 years on systems: PHP, Laravel, Magento and WordPress for teams in Venezuela, the United States, Spain and Chile. I work remotely from Tinaco.

Current focus · 2023–2026

Node.js and React. Applications with the interface in React and the services in Node.js.

Zoho CRM. Integrations, automations and development so sales and operations share the same data.

AI models. Assistants, extraction and classification inside the product workflow.
